

Sensor Gas Chromatograph

Sulfide Analyzer

ODSA-P2

Sensor Gas Chromatograph (SGC) uses a highly sensitive semiconductor gas sensor as a gas detector. The original built-in column is small, enabling the sample gases to be very sensitive and quick separation.

PC is not included.

Features

- Highly sensitive to major sulfides (ppb order)
- Easy operation, just push the switch to start the measurement
- Short time measurement (4 min)
- Attached software displaying output signal and gas concentration
- No complicated maintenance and calibration are required
- Small size: 260(W) x 135(H) x 340(D) mm
- Can be customized upon request
